Jennifer Walters was a shy attorney, good at her job and quiet in her life, when she was gunned down by criminals. A gamma-irradiated blood transfusion from her cousin, Dr. Bruce Banner, A.K.A. the Incredible Hulk, didn't just give her a second chance at life, but also super-strength and bulletproof green skin--and unbelievably gorgeous hair. She is the Sensational...

She- HULK

Previously...

Jennifer Walters is the whole package. When she's not saving the world with the Avengers as **She-Hulk**, she works as a lawyer in New York City. She lives in a glamorous apartment, has glamorous friends, and is currently dating fellow super hero **Jack of Hearts** (even though he accidentally drained her gamma radiation once).

Her life is so good, some people would *kill* to be her.

MARK BOOTH. Smart guy. Works for a start-up. Studied biological engineering. Could be running a lab of his own if he wanted to...

Honey, come on. It's going to be fine.

APRIL BOOTH. An even smarter girl. Started this start-up. Studied everything. Has ideas that could change the world.

I know it's going to be fine.

Because you trust me?

Yeah.

But mostly because I trust me.

I can't wait to see you green...

I might not be green...

You will be. We will be. Green is gold.

April loved Mark because he never expected her to be normal or want to do normal things.

She didn't have Netflix.

She's never been chill.

April loved Mark because he truly believed she was capable of anything.

He made her feel like even the sky wasn't the limit.

April loved Mark because he believed she could have whatever she wanted...

April wanted power.

She's obviously the best Hulk.

She-Hulk has everything...

Power and control. Strength and intelligence.

Invulnerability.

You sure you won't mind being green?

Why--will you mind me being green?

Nope. I'm here for all of it. Sickness, health, gammafication.

I hope I'm super jacked. Like, so jacked I can't shop at normal stores.

We could end up like the Hulk... it is his blood, ultimately.

I'm not worried. I trust that grade A Jennifer Walters DNA...

And I trust you.

Getting the blood was the easy part.

Why does Stark Industries have so much of Walters' blood?

Who even wants to know? Richards has gallons of it, too. His lab is just harder to hack.

April wanted to proceed carefully...

She wanted to think through all the ways it could go wrong...

What are you going to do first, when we're Hulks?

Depends. If it's morning, I'll have breakfast.

I'm going to smash something.

I'm just going to do everything I'd do anyway...

I've been wanting to meet the genius behind Booth Cybernetics.

Then let me introduce you to my wife.

"... but no one will ignore me..."

Affordable cybernetics, neural networking, remote control--ready stuff. The team loved it.

The team?

But they weren't sure how it would all play upstairs.

Upstairs...

The team really wants you to know that they love your thinking.

Wait, are you on this team?

"...and everyone is going to get out of my way."

It wasn't just She-Hulk's blood that made her magic-- it was her radiation. Her perfectly balanced gamma waves.

And you could take her radiation...

Someone had before.

TO BE CONTINUED!
